

# 2024 Updates: EOD Summary Stage

Melissa Riddle, ODS-C  
Iowa Cancer Registry  
December 2024

## Objectives

1

Understand the changes to EOD and Summary Stage

2

Realize the importance of these changes

3

Incorporate these updates into abstracting skills

# EOD Update Locations

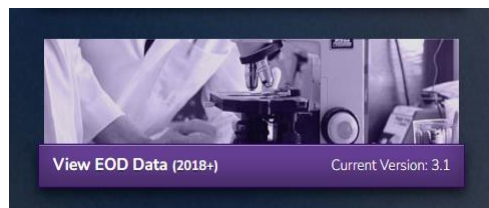

## Extent of Disease (EOD)

<https://seer.cancer.gov/tools/staging/eod/>

- General Instructions

## SEER\*RSA – EOD v3.1 (2024)

[https://staging.seer.cancer.gov/eod\\_public/list/3.1/](https://staging.seer.cancer.gov/eod_public/list/3.1/)

Updates are under news and announcements

### News and Announcements

October 16, 2024	New Version Release – View the changes and known issues in Version 3.2 (NAACCR 2025)
May 31, 2024	EOD Version 3.1 revised
September 14, 2023	New Version Release – View the changes and known issues in Version 3.1 (NAACCR 2024)

## Schemas Added:

Site	Schema ID	Changes	Notes
NET Stomach v9	09290	No change EOD or SS	
NET Duodenum v9	09301	No change EOD or SS	
NET Ampulla of Vater v9	09302	No change EOD or SS	
NET Jejunum and Ileum v9	09310	No change EOD or SS	
NET Appendix v9	09320	No change EOD or SS	
NET Colon and Rectum v9	09330	No change EOD or SS	
NET Pancreas v9	09340	Minor change EOD Primary Tumor	Histology 8272 added
Vulva v9	09500	Major update: EOD Primary Tumor & EOD Regional Nodes	Histologies added: 8041, 8982, 9064

5

5

## EOD Updates

- Bladder

- EOD Primary Tumor

- **New Note 5:** Invasion of muscularis propria is divided into superficial muscle (inner half) and deep muscle (outer half)
    - Can only be made when a cystectomy is performed
      - TURB only:
        - **Code 370:** invasion of muscularis propria
        - **Code 400:** invasion of muscularis propria + distal ureter involved
        - Either code 370 or 400 based on pathologist/physician documents superficial muscle or deep muscle and there is only a TURB
      - Cystectomy performed:
        - **Only use Codes 200, 250, 300, and 350**

6

6

## EOD Primary Tumor - Bladder

- **Code 720** Extravesical tumor with extension to:
  - Abdominal wall
  - Bone
  - Pelvic wall
  - Pubic bone
  - Rectum
    - *Colon was removed from the list; colon is included in code 650*
    - No effect on previous cases both 650 and 720 derive D

7

7

## EOD Kidney Parenchyma

- **EOD Primary Tumor**
  - Involvement of Adrenal Gland (ipsilateral; contiguous involvement) moved to **code 600**
    - Removed from code 500
- **EOD Mets**
  - **Code 70**
    - Adrenal gland (ipsilateral; noncontiguous involvement)
    - Extension to contralateral adrenal gland

8

8

## EOD Lung

- EOD Primary Tumor

- **Note 6:** Atelectasis is the failure of the lung to expand (inflate) completely
  - *If the atelectasis is clearly related to obstructing tumor – code 450*
  - *If the atelectasis is clearly related to lymph nodes – code to EOD Regional Nodes*
  - *If unable to determine – code to EOD Regional Nodes*
- **Code 675**
  - Adjacent rib (contiguous involvement **only**) – see EOD Mets for noncontiguous

- EOD Mets

- **Code 50**
  - Adjacent rib (noncontiguous involvement **only**) – see EOD Primary Tumor for contiguous

9

9

## EOD NET Pancreas

- Applies to years: 2018-2023 (v8), 2024+ (v9)

- EOD Primary Tumor

- **Code 300**
  - Ampulla of Vater (*added*)
- **Code 500**
  - All sites (subsites)
    - **Ampulla of Vater removed – Found to be in the wrong code**
  - Head of pancreas
    - Gastroduodenal vein (*added*)
  - Body and/or tail pancreas
    - **Note:** Superior mesenteric vein removed, already included in "All Sites" (**added**)

10

10

## EOD Vulva

- Applies to 2024+ (v9)
- **EOD Primary Tumor**
  - Code 700 - removed
    - Code no longer applicable in the Vulva schema due to changes in AJCC T definitions
  - **New Code 650**
    - Bladder mucosa
    - Perineal body
    - Rectal mucosa
    - Urethra:
      - Upper/proximal two-thirds
    - FIGO Stage IIIA based on extension

*Note 1:* Pubic/pelvic bone and further contiguous extension moved to new code 750

11

11

## EOD Vulva 2024+

- **EOD Primary Tumor**
  - **New Code 750**
    - Fixed to pubic bone (pelvic bone)
- **EOD Regional Nodes**
  - **Removed:** 050, 100, 200, 300, 400, 500, 600, 700, 750
  - **New Code 040**
    - Isolated tumor cells in regional LN less than 0.2mm **OR** single cell or clusters of cells less than or equal to 200 cells in a single LN cross section
  - **New Code 110**
    - LN involvement and size of metastasis greater than 0.2mm but less than or equal to 2mm

12

12

# EOD Vulva 2024+

## • EOD Regional Nodes

- **New Code 120**
  - LN involvement and size of metastasis greater than 2mm but less than 5mm **or** FIGO Stage IIIA
- **New Code 150**
  - LN involvement and size of metastasis greater than 5mm **or** FIGO Stage IIIB
- **New Code 250**
  - LN involvement with extranodal extension (ENE) **or** FIGO Stage IIIC
- **New Code 310**
  - Non-fixed, non-ulcerated LN involvement **or** FIGO Stage III
- **New Code 650**
  - Fixed or ulcerated LN involvement **or** FIGO Stage IVA based on LN involvement

13

13

# EOD Appendix

## • EOD Primary Tumor

- **Code 600**
  - Do **NOT** use for any appendix primary diagnosed 2018+
    - Even though it is currently listed – removing code 2025
  - See EOD Mets for RLQ peritoneal involvement
  - SING 20230062
- **Codes 700 & 750**

- Apply to **ONLY** contiguous tumor extension to listed sites

**Note 7:** Codes 700 and 750 are used for contiguous extension from site of origin. ~~Except for intraperitoneal metastases limited to the RLQ of the abdomen for mucinous tumors (see code 600); discontinuous involvement is coded in EOD Mets.~~

- Strikethrough text is being removed from note in 2025

14

14

# EOD Appendix

- **Peritoneal Metastasis** (SINQ 20230062)
  - Changed from T category in AJCC 7<sup>th</sup> to M category in AJCC 8<sup>th</sup> and 9<sup>th</sup>
  - **Effective immediately** abstract peritoneal deposits in RLQ as:
    - EOD Primary Tumor code 500
    - EOD Mets Code 30
  - 2025 updates will correct for this via conversion for cases diagnosed 2018+
    - EOD Primary Tumor = 600 and EOD Mets = 00 to
    - EOD Primary Tumor = 500 and EOD Mets = 30

15

15

## Summary Stage v3.1

16

16

# SS Update Locations

## Summary Stage v3.1 (2024)

<https://seer.cancer.gov/tools/ssm/>

### Revision History

The [change log](#) (PDF, 403 KB) contains updates made between version 3.1 and 3.2.

Refer to the [Historical Staging and Coding Manuals](#) for previous versions of the manual.

17

17

## Summary Stage

- Prostate
  - **Note 8:** If a needle core biopsy confirms extraprostatic extension, that information can be used for Summary Stage
  - Rest of the notes renumbered

18
