

# **Cancer in Adair County**

*Whitney Zahnd, PhD & Amanda Kahl, MPH*

July 7, 2025

# Who we are

## **Whitney Zahnd, PhD**

- Assistant Professor, University of Iowa College of Public Health
- Past-president of the Iowa Rural Health Association
- Member of the Cancer Epidemiology and Population Sciences Program, Holden Comprehensive Cancer Center
- Research: rural-urban differences in cancer prevention, incidence and outcomes, access to care

## **Amanda Kahl, MPH**

- Epidemiologist, Iowa Cancer Registry
- Research: rural-urban differences in treatment and quality of cancer care; cancer registry data quality

# 99 Counties Project Team

Iowa Cancer  
Consortium

**IOWA**  
HEALTH CARE  
Holden Comprehensive  
Cancer Center

**IOWA**™ | Health and  
Human Services

*"Statistics are people  
with the tears wiped away"*

*Dr. Irving Selikoff*

Iowa has the **#2**  
highest rate of new  
cancers in the U.S.

2020 data not included

# Over half of Iowa's counties have a higher incidence rate than the U.S.

**56** Counties with rates **OVER** the national average

**0** Counties below the national average

■ Above National rates  
■ Similar to National rates

# About the Project

**Goal:** to enhance community engagement & education around cancer prevention and control across all of Iowa's 99 counties.

Present county-specific cancer data

Listen

Provide  
Resources

Recommend  
actions

# Cancer Control Partners in Iowa

## State Government

### Governor

- Implement state laws
- Advance and pursue policies and programs

### Iowa Legislature

- Propose and vote on legislation
- Appropriate money to state agencies and programs
- Create and modify Iowa laws

### Bureau of Chronic, Congenital and Inherited Conditions

#### Comprehensive Cancer Control Program

Cancer prevention, screening, survivorship

Care for Yourself  
(Breast & Cervical Cancer Program)

Colorectal Cancer Screening Program

### Bureau of Environmental Health Services

- Track environmental health-related diseases
- Assist local boards of health

### Local (County) Public Health Services/Boards of Health

- Address health priorities and health disparities
- Promote healthy living
- Protect against environmental hazards
- Assure access to health services

Unity Point, MercyOne, Great River, Avera, Mayo, Methodist, Gundersen, Sanford and numerous independent **health systems, hospitals and clinics across Iowa**

Provide cancer prevention, screening, treatment, and survivorship services

Iowa Cancer Consortium

Advocate, collaborate, plan

### Iowa Cancer Action Network

Advocate for better policies

### ACS Iowa

Help with cancer treatment and recovery

Holden Comprehensive Cancer Center

Iowa's only NCI Designated Cancer Center

Health Care, research, education

STATE HEALTH REGISTRY OF IOWA

Data, research, education

## UI Research Centers

Center for Health Effects of Environmental Contamination

# Federal Funding for Cancer Control

- The Iowa Cancer Registry is funded in part with Federal funds from the **National Cancer Institute (National Institutes of Health)**, Department of Health and Human Services, under Contract No. HHSN261201800012I
- The Cancer in Iowa: 99 Counties Project is specifically funded by Federal funds from the **National Cancer Institute** through grant award: 5R01CA254628-04S2, and through National Cancer Institute funds provided to the University of Iowa Holden Comprehensive Cancer Center (P30CA086862)
- The Iowa Cancer Consortium acknowledges the **Centers for Disease Control and Prevention (CDC)** for its funding support under cooperative agreement NU58DP007103 awarded to the Iowa Department of Health and Human Services (Iowa HHS).

The contents of this presentation are solely the responsibility of the authors and do not necessarily represent the official views of CDC or the National Institutes of Health/National Cancer Institute.

# Iowa Cancer Registry Goals

**Assemble & report data** on new cancers, cancer deaths, & survival

Respond to **data requests** from organizations & individuals

**Support studies** for cancer prevention, research & education

# **Background on Cancer**

# Cancer is Complicated

There is no one cause of cancer; it is a combination of different **genetic, lifestyle,** and **environmental** risk factors that change the function of cells

# Cancer is Complicated

**Risk factors** are things that increase your chances of getting cancer

- Tobacco
- Alcohol
- Unhealthy diet
- Not being physically active
- Sunburns

- Family history of cancer
- Random mutations

- Exposure to chemicals
- Radiation

- **Aging**
- Viruses (HPV, HIV)
- Medical conditions like chronic inflammation

# Cancer & the Environment

---

- Many Iowans understandably have questions about potential links between environmental exposures and cancer
- This is an important area of continued research, and Iowans are right to ask questions and be cautious
- ICR, along with other population-based cancer registries, do not collect data on environmental risk factors, but we do share our data with researchers to support studies of cancer & environmental risk factors

# Risk Factors

---

- There can be many years between exposure to risk factors & cancer development, which makes it difficult to prove connections.
  - For example, lung cancer may not occur until 30 years after a person starts smoking
- To reduce your risk, **avoid risk factors** whenever possible
- Today we will focus on things you can do to reduce your cancer risk. These things can be addressed at the state, community, and individual levels.

# **Key Terms**

# Incidence & Mortality

---

- Incidence
  - Number of **new cases** of a disease occurring during a specified time period in a population
- Mortality
  - Number of **deaths** from a disease that occur during a specified time period in a population

# Rates & Counts

---

- Counts
  - The **number** of new cases diagnosed or deaths from cancer
- Rates
  - Adjusts the counts to give a **# per 100,000 people**
- Age-Adjusted Rates
  - Addresses the question: *If the size and age of the populations were the same, would there be a difference in outcomes?*

# **Stage definition used today**

- Early Stage includes
  - Localized: cancer is limited to the place where it started, with no sign that it has spread
- Late Stage includes
  - Regional: cancer has spread to nearby lymph nodes, tissues, or organs.
  - Distant: cancer has spread to distant parts of the body

<https://www.cancer.gov/about-cancer/diagnosis-staging/staging>

# How to read the graphs

Unless otherwise stated,  
bars are your county data

Black lines on  
bar graphs  
are United  
States data

Grey boxes on  
bar graphs are  
95% Confidence  
Intervals.

These are used to  
determine if rates  
are statistically  
different from  
each other

# **Cancer in Adair County**

# New Cancers in Adair County

All cancer types, average counts and rates, 2017-2021

Each year, there are about

**46**

new cancers diagnosed in  
Adair County

Cancer incidence rates in Adair County  
are **not different from the U.S.  
average**

Ranks #99 of 99 counties

Cancer incidence rates are typically  
higher in men than women

Age-Adjusted rate per 100,000 (2017-2021)

# Cancer deaths in Adair County

All cancer types, average counts and rates, 2018-2022

Each year, there are about

**19**

cancer deaths in Adair County

Cancer mortality rates in Adair County  
are **not different from the U.S.  
average**

Ranks #57 of 99 counties

Cancer mortality rates are typically  
higher in men than women

Age-Adjusted rate per 100,000 (2018-2022)

# Top cancers in Adair County

# #4 | Colorectal cancer | Stage at Diagnosis

Early stage = Easier to treat, Higher survival rates

**68%**  
Diagnosed at a Late  
Stage

Data from 2012-2021

# Iowa Get Screened (IGS): Colorectal Cancer Program

**We partner with Iowa's Federally Qualified Health Centers (FQHCs) and local public health agencies to increase colorectal cancer screening.**

Through a collaboration with the Iowa Primary Care Association (Iowa PCA) and FQHCs, the program serves low-income Iowans, ages 45-75, to:

- ▶ Increase the number of cancers prevented
- ▶ Increase the diagnosis of early-stage colorectal cancer
- ▶ Reduce colorectal cancer incidence and mortality in the state

<https://hhs.iowa.gov/public-health/cancer/colorectal-cancer-screening-program>

# A vaccine that prevents cancer: HPV

Adolescents ages 13-15 who have completed their HPV vaccine series (2022)

- HPV infection can cause cancers of the cervix, mouth and throat, anus, rectum, penis, vulva, and vagina.
- Iowa has the highest rate of oropharyngeal cancer in the U.S.
- Vaccine provides safe, effective, and lasting protection against HPV, thus reducing cancer risk
- Recommended at age 11 or 12 years, when immune response is best & before HPV exposure

*Data from 2022 IHHS & NIS-Teen  
Goal: 80% by 2027*

After the last tobacco tax was passed in 2007, smoking rates  
**decreased** in **92%** of Iowa counties

# After the last increase to the tobacco tax was passed in 2007, smoking rates **decreased\*** in Adair County

# Other Cancer Risk Factors

**Lower  
is  
better**

---

# **Resources** to help understand and address cancer in Iowa communities

# Iowa Comprehensive Cancer Control Program (CCCCP)

**We work with partners to prevent cancer whenever possible and support cancer survivors across Iowa.**

- ▶ The CCCCp partners with many organizations, including the Iowa Cancer Consortium, Iowa's cancer coalition.
- ▶ CCCCp is involved in the revision and implementation of the Iowa Cancer Plan.
- ▶ Currently CCCCp is focused on increasing HPV vaccination, increasing lung cancer screening, and supporting cancer survivors.

<https://hhs.iowa.gov/public-health/cancer>  
<https://canceriowa.org/iowa-cancer-plan/>

# Iowa Cancer Consortium

**Mission:** To advance cancer prevention and control through advocacy, equity, and collaboration.

**Vision:** An Iowa where cancer is not a burden.

A non-profit cancer coalition that provides

- Connections and partnership
- Latest news and cancer updates via email
- Training and educational opportunities
- Grant opportunities and technical assistance
- Free cancer educational materials for distribution
- Virtually-hosted workgroups
- The Iowa Cancer Plan

[www.canceriowa.org](http://www.canceriowa.org)

# Blueprint for cancer control, the *Iowa Cancer Plan*

Chapters with sections that include priorities, strategies, and specific action steps which may be tailored to many settings to guide cancer control activities.

- 1. Health Equity:** identify and eliminate cancer health disparities.
- 2. Prevention and Risk Reduction:** whenever possible, prevent cancer from occurring.
- 3. Early Detection and Screening:** promote the benefits of screening tests to ensure early diagnosis.
- 4. Diagnosis and Cancer-Directed Therapy:** reduce barriers to care, promote evidence-based practices, and encourage participation in clinical trials and other forms of research.
- 5. Survivorship and End-of-Life Care:** ensure resources to optimize quality-of-life for cancer survivors and their families.

[https://canceriowa.org/  
iowa-cancer-plan/](https://canceriowa.org/iowa-cancer-plan/)

# Ways to get involved

## Iowa Cancer Plan

Use to identify strategies aligned with community-specific needs

[canceriowa.org/iowa-cancer-plan/](https://canceriowa.org/iowa-cancer-plan/)

## Iowa Cancer Consortium

Connect for state-wide collaboration and potential community-level funding

[www.canceriowa.org](https://www.canceriowa.org)

## American Cancer Society Cancer Action Network

Engage American Cancer Society Cancer Action Network (ACSCAN) to promote cancer-relevant legislation

[www.fightcancer.org](https://www.fightcancer.org)

## Contact your legislator

Find your legislator at

<https://www.legis.iowa.gov/legislators/find>

# Community Policy Considerations

## Lung Cancer

We know tobacco- and nicotine-free policies, reducing out-of-pocket costs for cessation treatments, and mass communications can help reduce lung cancer

## Breast Cancer

We know engaging community health workers, developing clinic-specific interventions, and supporting care navigation are effective in addressing breast cancer.

## Skin Cancer

We know providing sunscreen and UV-safety education in outdoor occupational, recreation/tourism, and childcare settings can help prevent skin cancer.

## Prostate Cancer

We know educating about the link between

- tobacco, alcohol, and obesity and prostate cancer;
- chemical exposures and prostate cancer;

as well as promoting shared decision-making between individuals and providers helps reduce the burden of prostate cancer.

## Include cancer in needs assessments

Include cancer-relevant strategies in your hospital's community health needs assessments or public health department's needs assessment

[hhs.iowa.gov/lphs/cha-chip](https://hhs.iowa.gov/lphs/cha-chip)

# Every community is different

---

- **Your expertise is key**
  - Your expertise as community members and leaders and local policy makers is key to answering the question of what to do next. You know best what your community needs and what will work.
- **Cancer control partners** like the Iowa Cancer Registry, the Iowa Cancer Consortium, Iowa HHS, and your local public health department can provide ideas, advise, and help find data, evidence, and other resources, but ultimately you are the experts.
- A good place to start is by **taking stock of the information presented today** and where the opportunities for change might be within your county, town, or organization. Use the Iowa Cancer Plan for inspiration and reach out to the Iowa Cancer Consortium for partnership in moving forward.

# Adair County Resources

## Immunizations

Adair County Public Health participates in the Vaccine for Children Program, which offers no cost immunizations to children ages 0-18 years who are uninsured, underinsured, American Indian or Alaskan Native.

Visit:

<https://www.achsiowa.org/adair-county-public-health-services> for more information

## Health Screenings

- Free blood pressure screenings during open office hours.

## Cancer Screening

- No cost mammograms and pap-smears (to screen for breast and cervical cancer) for those who qualify based on income through the Care for Yourself Program
- Low dose CT lung cancer screenings are available at Adair County Memorial Hospital in Greenfield

# Adair County Resources

## Radon Tests

Radon test kits can be purchased at the Guthrie Environmental Health office for \$18.00 per kit

2002 State Street  
Guthrie Center, IA 50115

641-747-3972

[https://guthriecounty.gov/environmental\\_health/radon\\_testing/](https://guthriecounty.gov/environmental_health/radon_testing/)

## Private Well Testing

Well Water Testing is available through Guthrie County Environmental Health

Call 641-747-3972 for more information

[https://guthriecounty.gov/environmental\\_health/rates/](https://guthriecounty.gov/environmental_health/rates/)

## Zion Integrated Behavioral Health Services

School-based programs that provide positive, research-based presentations, programs, and training on alcohol, tobacco, and other drug use and abuse prevention.

- IHHS Programs
  - Tobacco Use Prevention and Control
  - Immunization Program
  - The Hepatitis Program
  - Radon
- Iowa Rural Health Association

## In the next slides we will highlight...

- Cancer Cluster Concerns
- Agricultural Health Study
- Environmental Exposures and Health Risks Fact Sheets
- Center for Health Effects of Environmental Contamination
- Iowa Private Well Grants Program
- Center for Energy & Environmental Education's (CEEE) Environmental Health Program

[www.iowacancerregistry.org/99](http://www.iowacancerregistry.org/99)

# What to do if you suspect a cancer cluster in your community

- If you are concerned about cancer excess in your area, please email us at [ICR-CancerConcerns@uiowa.edu](mailto:ICR-CancerConcerns@uiowa.edu)
- We will ask you about:
  - Geographic area of concern
  - Cancer types diagnosed in the area
  - Time frame
  - Exposure(s) of concern
- If possible, ICR will conduct an analysis comparing the expected number of cancers to what's been observed
- A meeting will be held to discuss the results of the analysis and a written copy of the report will be sent to you

# Agricultural Health Study

The Agricultural Health Study (AHS) has been working for more than 30 years to understand factors that impact the health of farmers and their families.

- Includes over 31,000 private and 5,000 commercial pesticide applicators from Iowa
  - Study is also following applicator's spouses and children
- Linked with Iowa Cancer Registry data to study risk of developing cancer among pesticide applicators

The aim of this study is to understand how agricultural, lifestyle, and genetic factors affect the health of farming populations.

[aghealth.nih.gov](http://aghealth.nih.gov)

Visit the Ag Health website to read their annual study updates related to pesticides and other agricultural exposures and cancer.

# Environmental Exposures and Health Risks Fact Sheets

These facts sheets include information on

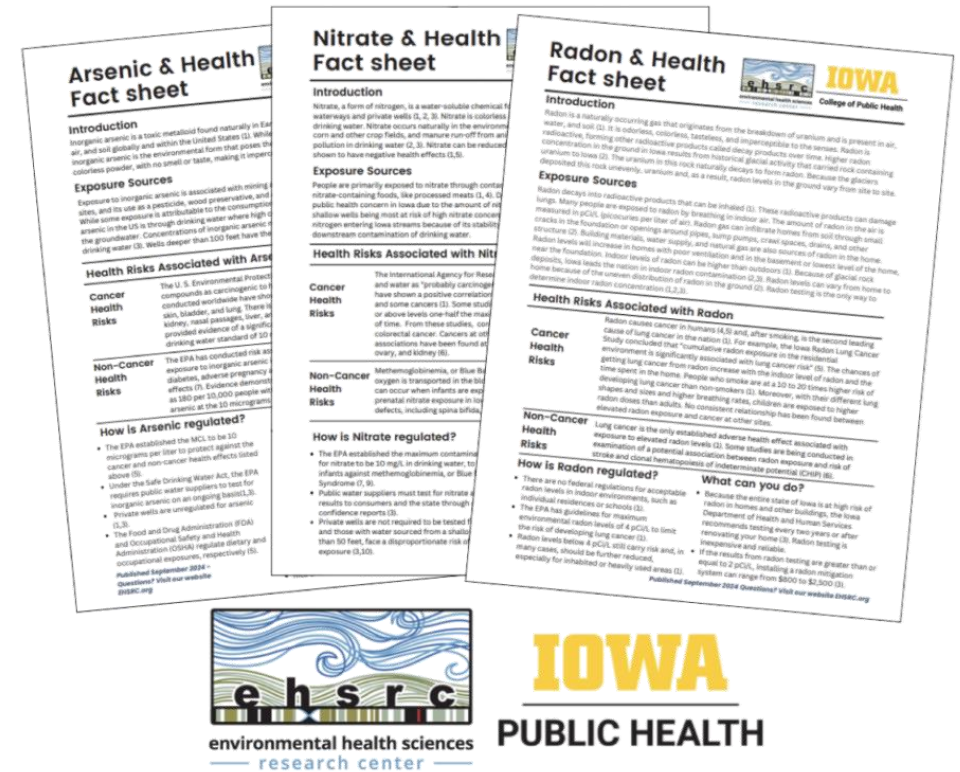

- Cancer and non-cancer health risks for each environmental exposure
- How the exposures are regulated
- What you can do to limit your exposure

## Environmental Health Fact Sheets

- [Arsenic](#)
- [Atrazine](#)
- [Glyphosate](#)
- [Nitrate](#)
- [Radon](#)

## NEW Environmental Exposures & Health Risks Fact Sheets

<https://ehsrc.public-health.uiowa.edu/communityengagement/resources-information/>

# Nitrate & Health Fact sheet

Coll

## Introduction

Nitrate, a form of nitrogen, is a water-soluble chemical found at high concentration in waterways and private wells (1, 2, 3). Nitrate is colorless and has no smell, so it is invisible in drinking water. Nitrate occurs naturally in the environment; however, applying nitrogen fertilizer to corn and other crop fields, and manure run-off from animal feeding operations can contribute to nitrate pollution in drinking water (2, 3). Nitrate can be reduced to nitrite and other compounds, which have been shown to have negative health effects (1,5).

## Exposure Sources

People are primarily exposed to nitrate through contaminated drinking water and food. Nitrate-containing foods, like processed meats (1, 4). Drinking water contaminated with nitrate is a public health concern in Iowa due to the amount of nitrogen fertilizer used in agriculture, with shallow wells being most at risk of high nitrate concentrations (3). Nitrate is the most common nitrogen entering Iowa streams because of its stability and water-solubility, potentially leading to downstream contamination of drinking water.

## Health Risks Associated with Nitrate

### Cancer Health Risks

The International Agency for Research on Cancer (IARC) classifies nitrate in food and water as "probably carcinogenic to humans" (1, 5). Studies conducted in Iowa have shown a positive correlation between exposure to nitrate in the drinking water and some cancers (1). Some studies conducted in Iowa have analyzed cancer risk at or above levels one-half the maximum contaminant level (MCL) over long periods of time. From these studies, consistent associations have been discovered for **colorectal cancer**. Cancers at other sites have been less studied, however, positive associations have been found at levels below the MCL for cancers of the **thyroid, ovary, and kidney** (6).

### Non-Cancer Health Risks

Methemoglobinemia, or Blue Baby Syndrome, is a condition in which not enough oxygen is transported in the blood to the body's tissues (3). Blue Baby Syndrome can occur when infants are exposed to nitrate levels higher than 10 mg/L. Elevated prenatal nitrate exposure in Iowa has also been connected to increased risk of birth defects, including spina bifida, limb deficiencies, and cleft palate (7,8).

## How is Nitrate regulated?

- The EPA established the maximum contaminant level for nitrate to be 10 mg/L in drinking water, to protect infants against methemoglobinemia, or Blue Baby Syndrome (7, 9).
- Public water suppliers must test for nitrate and present results to consumers and the state through consumer confidence reports (3).
- Private wells are not required to be tested for nitrate, and those with water sourced from a shallow well, less than 50 feet, face a disproportionate risk of high nitrate exposure (3,10).

## What can you do?

- Test well water for nitrate once a year if the well is privately-owned.
- Water purification methods that remove nitrate include reverse osmosis, ion exchange, and distillation. Using Brita filters, refrigerator filters, and boiling water are not effective at removing nitrate (7).
- Maintain a healthy diet rich in antioxidants and limited in processed, cured, and red meats (1). **Published September 2024**  
**Questions? Visit our website EHSRC.org**

<https://ehsrc.public-health.uiowa.edu/communityengagement/resources-information/>

# Iowa Private Well Grants Program

## Iowa Health & Human Services

Iowa's [Private Well Grants Program](#) (PWG) provides free water testing to all private well owners and users for the analytes listed. The Iowa DNR recommends that all private well owners have their water tested at least annually.

- [Bacteria/coliform](#) (annually)
- [E.coli/fecal coliform](#) (annually)
- [Nitrate](#) (annually)
- [Arsenic](#) (every 3 years)
- [Manganese](#) (every 3 years)
- [PFAS](#) (requires pre-approval from the DNR)

To get your private well tested, please contact your local county health department.

[County Health Department - contact list](#)

# Center for Health Effects of Environmental Contamination (CHEEC)

CHEEC

The University of Iowa Center for Health Effects of Environmental Contamination (CHEEC) supports and conducts research to identify, measure and study adverse health outcomes related to exposure to environmental toxins. CHEEC was established through the 1987 Iowa Groundwater Protection Act and has focused its efforts to date mainly on drinking water contaminants.

**For questions about environmental contaminants, please contact Dr. Cwiertny at the email address below.**

David Cwiertny  
Director of CHEEC

[cheec.uiowa.edu](https://cheec.uiowa.edu)

Email: [cheec@uiowa.edu](mailto:cheec@uiowa.edu)

# Center for Energy & Environmental Education's (CEEE) Environmental Health Program

**Highlighting upstream solutions to protect children, climate, and health.**

The Environmental Health Program at the CEEE highlights upstream solutions that protect children, climate, and health, as well as raises awareness about the link between harmful chemicals and their impacts to both people and climate. Our initiatives focus on community practices and state strategies that significantly reduce Iowan's exposure to common hazardous pollutants.

Contact Audrey Tran Lam for more information and resources about how to reduce environmental exposures that may contribute to cancer development.

Center for Energy & Environmental Education

# Other initiatives in Iowa

## Understanding Cancer and Environmental Risk Factors in Iowa

A New Initiative from the Iowa Environmental Council and The Harkin Institute

The Harkin Institute and the Iowa Environmental Council are announcing the launch of a new initiative that explores the relationship between environmental risk factors and cancer rates in Iowa.

## STATEWIDE LISTENING SESSIONS

presented by

The Harkin Institute

## Expert Panel

UI Holden Cancer Center is bringing renowned national and international cancer experts together to investigate Iowa's cancer rates

**IOWA**  
HEALTH CARE

Holden Comprehensive  
Cancer Center

<https://www.iaenvironment.org/our-work/cancer-and-environmental-risk-factors-in-iowa/>

# Main Takeaways

Cancer is an important health issue facing your county

There are proven ways to prevent cancer & find it early  
You can avoid risk factors and get screened

Iowa has a strong Cancer Plan, resources, & organizations to help fight cancer

Policy changes at the local and state levels can have a huge impact!  
Please communicate your concerns & needs with your state representatives and local policymakers

**This is only the first step.**

# These slides will be posted

These slides will be posted to the Iowa Cancer Registry website:

[www.iowacancerregistry.org/99](http://www.iowacancerregistry.org/99)

If you have questions, please email us at

[ICR-99countiesproject@uiowa.edu](mailto:ICR-99countiesproject@uiowa.edu)

## Media

If you are a representative of the media and would like more information on this presentation or to speak with someone from the Iowa Cancer Registry, contact [ICR-Media@uiowa.edu](mailto:ICR-Media@uiowa.edu).

# Thank you for attending!

---

If you would like to **share your thoughts** on this meeting, please participate in our brief survey. The QR code will direct you to the survey.

This brief survey should take no more than 5-10 minutes of your time.
